DATE STONES AND PLAQUES

The use of permanent seals, mottoes, agencies or individuals' names in, on or about any building project is prohibited. However, the official name of the building may be inscribed or affixed to its surface providing the Campus obtains the Board of Trustees approval.

The design of date stones is to include a concealed space, approximately 6” x 12” x 18”, so that a Group III lead box may be inserted in, or behind it. The materials to be placed in the box are to be determined by each Campus. The face of the stone is to show only the year of completion.
