LOCKERS

1. Lockers and benches are usually Group III equipment. Coordinate with the Campus and Fund on who will provide lockers and benches.

2. Lockers shall be either single- or double-tier lockers. Coordinate size of lockers with Campus and manufacturer. Provide with a masonry base or locker leg base.

3. If provided with a masonry base, base shall be independent of floor and shall be provided in the building contract. Lockers shall overhang the base by 2 inches.

4. No anchorage is required to be provided in the building contract for lockers or benches, but the substrate shall be capable of anchoring them to the manufacturer’s stated requirements.

5. If lockers are provided in building contract, coordinate with the Campus for type of top (sloping or flat) and numbering and locking requirements.

6. Coordinate for ADA access.
